KNOWN KNOWNS

IEBC December 18th 2012 Voter Register

- Luo Vote = 1,676,428

- Kamba Vote = 1,069,529

- CORD Coalition = **2,745,957**

The
CONSULTING
HOUSE
Policy Innovation and Security Thinktank

THE ANALYSIS

- The Jubilee vote (6.2 Million) is 2.3 times that of CORD (2.7 Million)

- Every Luo and Kamba vote will have to be cast twice to catch up with the GEMA and Kalenjin vote

COUNTY FACTS

- Jubilee will win 25% in at least 39 counties. Of the 39 counties, 7 are marginal. 32 counties are bankable.

- CORD will win 25% in at least 28 counties. Of the 28 counties, 7 are marginal. 21 counties are bankable

- **Conclusion:** The bare minimum number of counties is 24. Jubilee has 32 bankable counties while CORD has 21. This means that CORD could be in the red.

KNOWN UNKNOWNS

- Jubilee has a higher chance of winning the 50%+1 popular vote. It requires 1 Million votes to get to this mark

- CORD requires 4.3 Million votes to get to the 50%+1 mark

- For every 1 vote required by Jubilee to get to the 50%+1 mark, CORD requires 4 votes. The level of effort is 4:1

- **Analysis:** For CORD to win in round 1, (**7,168,700+1**) they require the support of all Luos (1.6 M), 80% of the Kamba (1M) and the entire GEMA vote (4.3M) = 6.9M + about 200,000 Bukusu Votes

UNKNOWN UNKNOWNS

- These are things that we do not know that we do not know

- Untimely death of incumbent president. This means that the current VP assumes office.

- A dysfunctional cabinet. In the event of an electoral crisis, cabinet will not be able to resolve it because of internal polarities. The defence council, which activates the military will step in.
